AI IN M&E TODAY

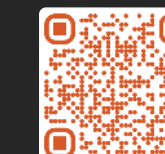

Traditional Orchestration Cannot Support A Broadcast Grade AI Enabled Service

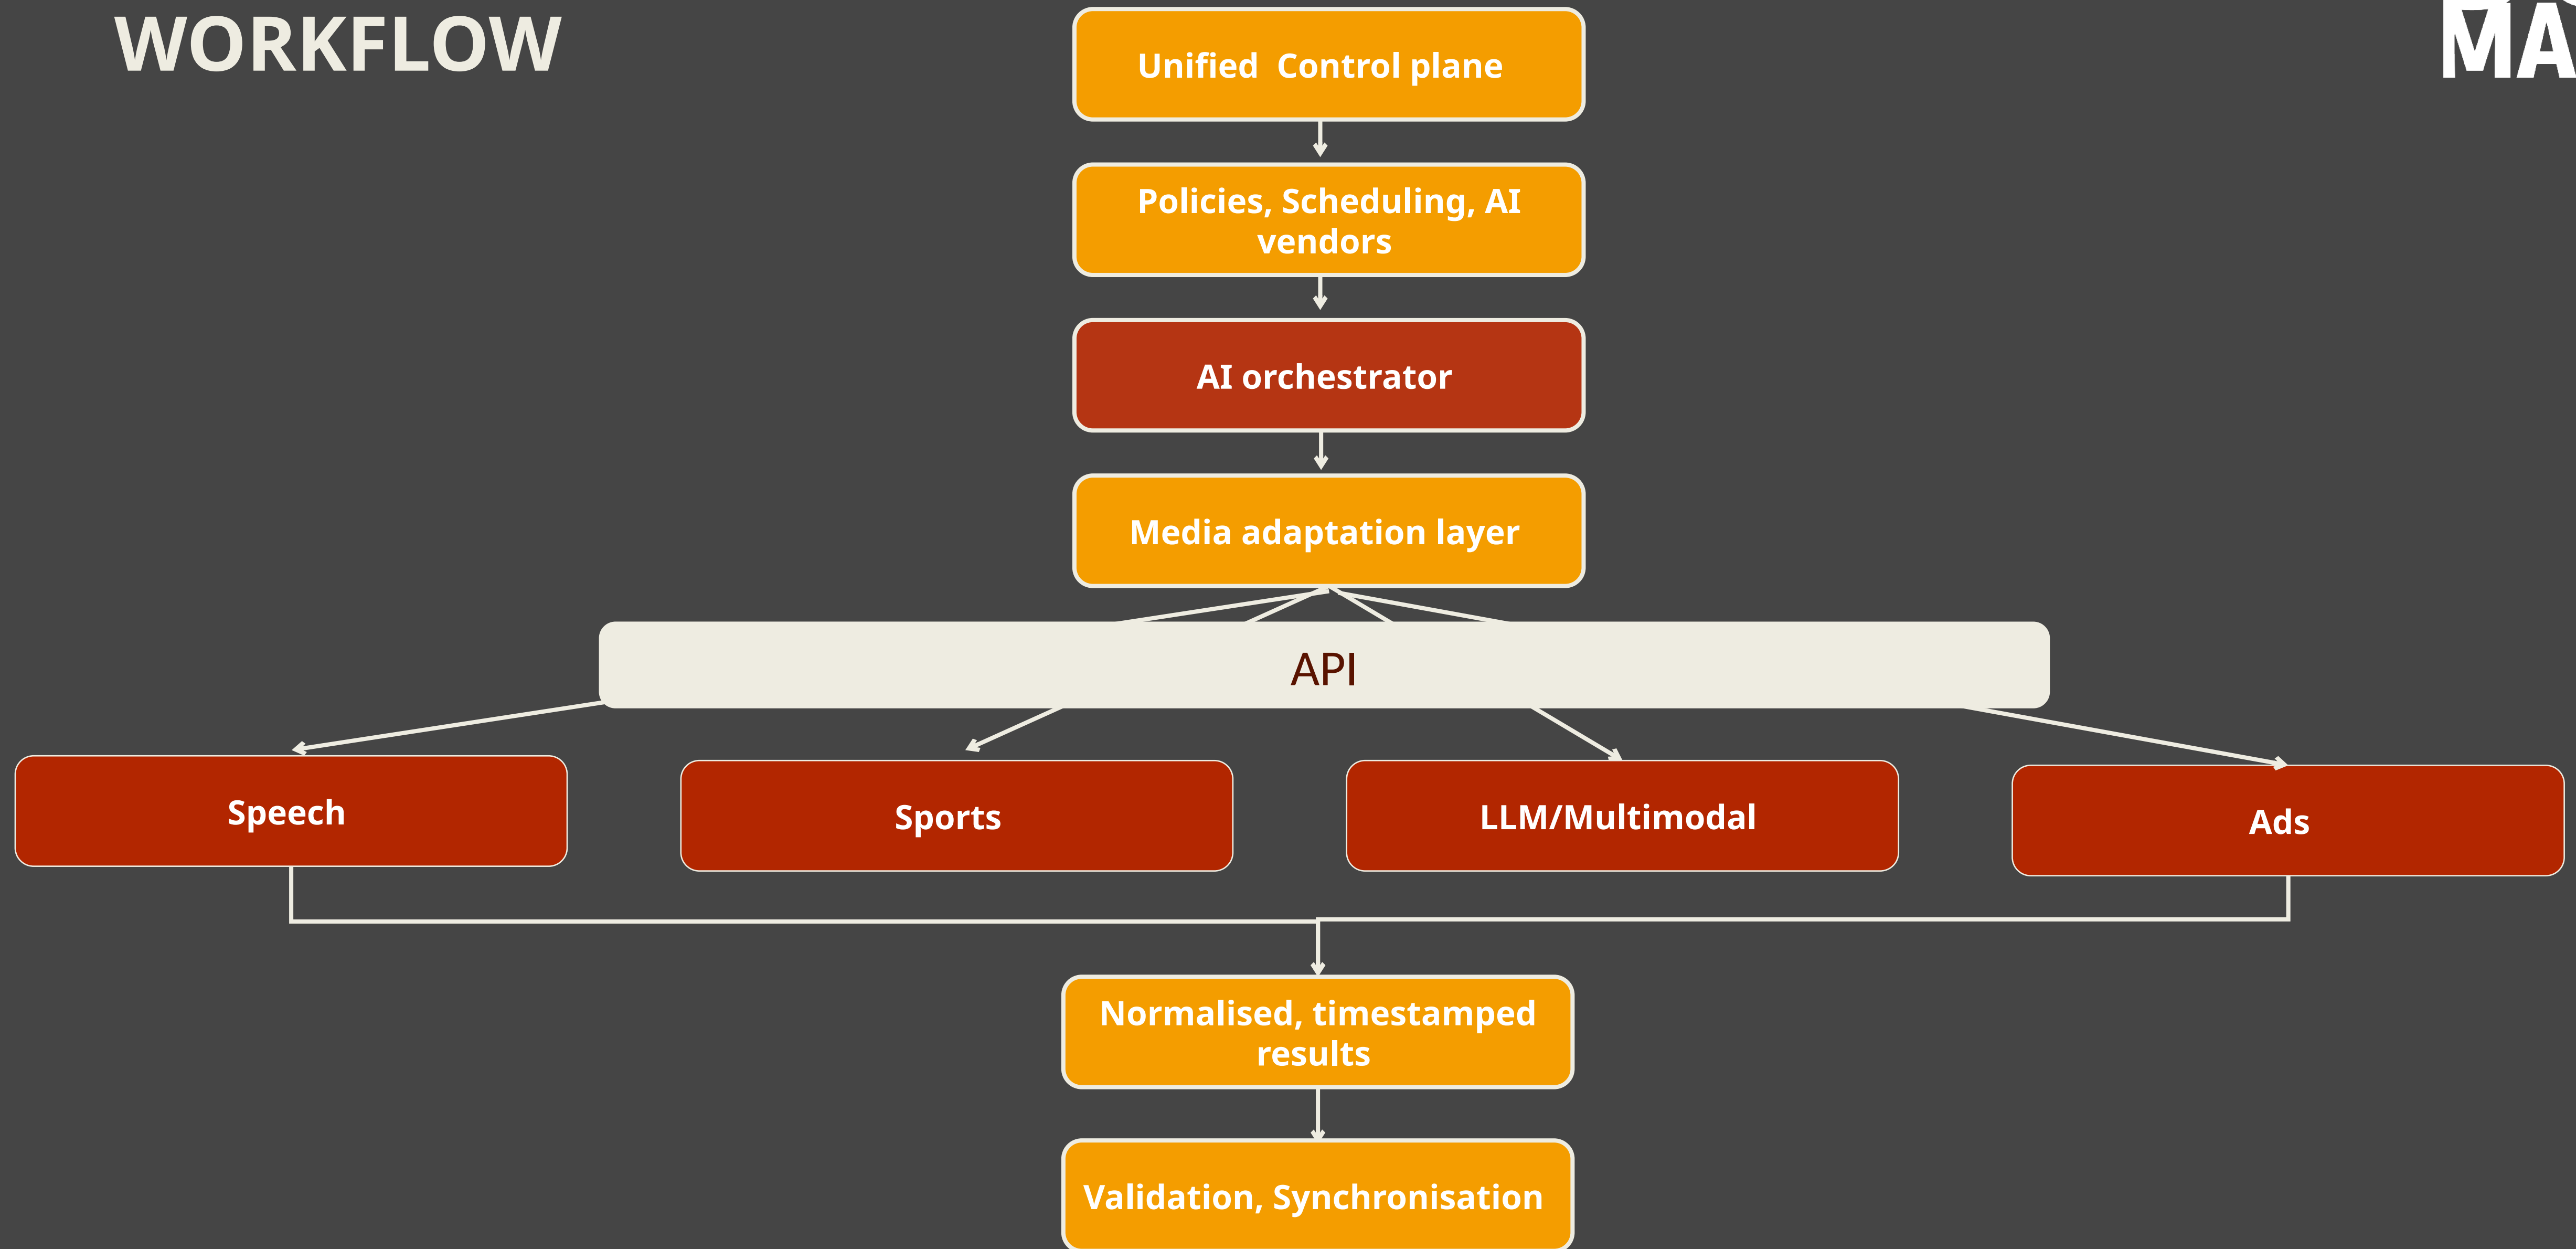

AI ORCHESTRATION

AI SERVICE	USE CASE	ORCHESTRATOR
Speech	Live transcription, translation, dubbing	Select services by language, quality, latency and cost; coordinate processing and fallback.
Sports	Automated live sports highlights	Select sport-specific models; correlate detected events and validate confidence.
LLM and Multimodal	Scene-level metadata and content descriptions	Combine transcripts, images and detected events; enforce grounding and structured output.
Advertising	Ad-break detection, contextual advertising	Reconcile detections

Possible only through an API based architecture

WORKFLOW

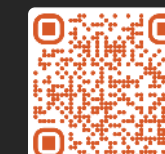

OUR LAST FINAL THOUGHT

To move to an orchestrated workflow, industry needs to define APIs, contracts, level of tolerance more adapted to AI.
